Alkindy College of Medicine
MBCChB Program
Digestive Module /year 2
2016/2017

Module Coordinator: Assistant Prof Dr.Ekhlal Khalid Hameed

Co-coordinator Lecturer Tahrir Etihad

VISION

Our vision is to prepare the students of medicine to their future clinical life by providing them with the essential basic knowledge from the disciplines included in this module.

MISSION

- a) To provide students of medicine with integrated disciplines of basic medical sciences to provide them with knowledge about the gastrointestinal system.**
- b) The above-mentioned mission will be achieved through integrated lectures, practical labs, seminars and tutorials.**
- c) Enable the students, through the integrated teaching, to comprehend the relation between structure, function, and abnormal structure of the gastrointestinal system.**
- d) In addition, at the end of this module, student shall be able to integrate the causes of disease to correlate clinical manifestations of diseases in the gastrointestinal System. The student shall understand diseases of national importance in relation to the clinical, therapeutic and medical aspects.**
- e) In addition students are given the opportunity to expand their scope of knowledge through SDL/CAL.**
