

Alkindy College of Medicine
MBCHB Program
2018-2019
Body control / Year 1

Module Coordinator: Dr. Hayder Sabah Al-Naji

Module co-coordinator: Dr. Aseel Sameer

VISION

Body Control module shall be a fundamental and indispensable preparation for year-I students to applied and clinical relevant basic sciences .The students will adopt new modalities of teaching learning and assessment methodology.

MISSION

- a) To provide students of medicine with integrated disciplines of basic medical sciences to provide them with knowledge about introduction to medical physiology, general histology, embryology, biochemistry in addition to anatomy.**
- b) The above-mentioned mission will be achieved through integrated lectures, practical labs, seminars and tutorials.**
- c) Enable the students, through the integrated teaching, to comprehend the relation between structure, function, and biochemical basis.**
- d) The teaching policy allows an overall view of basic science knowledge which prepares students for the clinical application of this knowledge.**
- e) In addition students are given the opportunity to expand their scope of knowledge through SDL/CAL.**
