

Alkindy College of Medicine

MBCHB Program

2018-2019

**ENDOCRINE SYSTEM
MODULE GUIDE/Year III**

Module Coordinator: Dr. Mohanad Monther

Module co-coordinator: Dr. Ragad E. Naji

VISION

Our vision is to prepare the students of medicine to their future clinical life by providing them with the essential basic knowledge from the disciplines included in this module.

MISSION

- a) To provide students of medicine with integrated disciplines of basic medical sciences to provide them with knowledge about the endocrine system.
- b) The above-mentioned mission will be achieved through integrated lectures, practical labs, seminars and tutorials.
- c) Enable the students, through the integrated teaching, to comprehend the relation between structure, function, and abnormal structure of the endocrine system.
- d) In addition, at the end of this module, student should be able to integrate the causes of disease to correlate clinical manifestations of diseases in the endocrine system. The student should understand diseases of national importance in relation to the clinical, therapeutic and preventive aspects.
- e) In addition students are given the opportunity to expand their scope of knowledge through SDL.
