

**AlKindy College of Medicine
MBChB Program
Forensic Medicine Module
2016-2017 / Year 4**

Module Coordinator: A.P.Dr .Yasser Salem Selman

VISION:

Teaching the fourth year student in the medical college all the forensic sciences starting from diagnosis of the death and its signs, then teaching them all medico-legal cases like wounds, asphyxia, burns, sudden death, poisoning and also the living cases, then ending to teach them how to deal with these medico-legal cases practically.

MISSION:

Teaching the new doctors how to diagnose the different medico-legal cases and how to deal with those cases when they arrive to the hospitals or when occurrence of a death in the hospital, and teach them how to write the primary medico-legal report in causality and the death certificate, and how to referring the sexual offences cases.
