

**PROJECT MODULE
KMC -UOB
Year III/ 2nd Semester
2016-2017**

**Module Coordinator:
Assist. Prof. Dr. Huda Adnan Habib AL-Mousawie
Co-Coordinator
Assist. Prof. Dr. Wijdan Akram**

Introduction

The project provides the opportunity for student to select 4 weeks course in an area of his/her interest. This course will give the student a chance to enhance his/her knowledge and skill in the area of interest. It can be in the field of Basic Medical Science, Para-clinical or Clinical departments. The project is intended to encourage experience and wider interests of the students beyond their main program of study.

The project serves to widen the student's experience in the field of medical education by a self-directed approach to seek knowledge in the specific area of interest. The gaining of a broader and further education can help the students to achieve skills and knowledge which may be very useful for them to choose their area of specialty in the future.

The selection of a project is the responsibility a group of students, but advice and information can be obtained from faculty (supervisor). Student should discuss project plans with his/her proposed supervisor, and also get final approval for his/her project.

In all cases, a letter of acceptance from the supervisor along with information as to the nature of the proposed project, together with your project protocol form must be submitted for written approval to module coordinator. Arrangements should be completed as early as possible and **AT LEAST ONE MONTHS BEFORE YOUR PROJECT MODULE BEGINS.**

Vision & Mission

Vision

The vision of the project in AL-Kindy College of medicine of Baghdad University is to extend and consolidate knowledge in areas of interest or weakness of medical students for fully committing towards ensuring high rate of student success.

Mission

We are committed to:
